**Turf Description:** Specifically designed to be used for moderate traffic on commercial and residential landscapes. Yarns are field green mixed with olive green colors. TigerTurf's Diamond Light Fescue synthetic grass is a premium artificial grass model and is a top choice among the nation's certified contractors and homeowners. In addition to its realistic appearance, Diamond Light Fescue artificial turf features a proprietary 3D Curvy 'W' blade shape, which allows this turf to handle moderate foot

**Turf Description:** No matter the weather condition, TigerTurf™ Diamond Light Spring synthetic grass will always provide lawns and commercial properties with a beautiful bright evergreen appearance; excessive water and maintenance are not required! Diamond Light Spring artificial grass showcases two beautiful field and clover green face yard color tones coupled with a green and tan thatch layer for added realism. Certified synthetic grass installers across North America agree Diamond
